REMARKS

Claims 1 - 14 are pending. Claims 3 and 5 have been amended. Claims 15 and 16 have

been canceled.

Claims 1 and 2 were not rejected and are assumed to be allowed.

Claims 3 - 16 are rejected under 35 U.S.C. 112, first paragraph, because the Examiner

asserts that the Specification, while enabling for lowering intraocular pressure, does not

reasonably provide enablement for providing neuroprotection. Claims 15 - 16 are rejected

under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out

and distinctly claim the subject matter which applicant regards as the invention because the

Examiner the Specification does not teach exactly what compounds can be considered " β -

blockers, prostaglandins, carbonic anhydrase inhibitors, miotics, calcium channel blockers and

NMDA antagonists."

In response, Applicants disagree with the Examiner's assertions about the lack of

enablement for the use of the compounds of the present invention as ocular neuroprotectants.

Applicants also disagree with the Examiner's assertion that Claims 15 and 16 are indefinite

because the Specification fails to define exactly what compounds are "β-blockers,

prostaglandins, carbonic anhydrase inhibitors, miotics, calcium channel blockers and NMDA

antagonists." These classes of compounds are well-recognized classes of compounds to a

person of ordinary skill in the art.

Nevertheless, in order to advance prosecution of the remaining claims in this case,

Applicants have deleted Claims 15 - 16 and amended Claims 3 and 5 so that the claimed

methods do not recite neuroprotection. Accordingly, the 35 U.S.C. 112 rejections are now moot.

5

U.S. Serial No. 10/525,410 Filed: January 26, 2005

Applicant believes that the above amendments and remarks have placed Claims 1 – 14 in condition for allowance. Accordingly, allowance of the claim in this application is respectfully requested.

Respectfully submitted,

ALCON
